## Professional Summary

MCA graduate with a strong foundation in Java, Python, SQL, REST APIs, React.js, and software development principles. Hands-on experience in backend application development, database operations, debugging, testing, and Git-based development through internship and academic projects. Familiar with DSA, OOP, SDLC, AI/ML, and prompt engineering, with a strong interest in full-stack, cloud-native, and AI-powered application development.

## Technical Skills

**Programming Languages:** Java, Python, SQL
**Frontend:** React.js, JavaScript, HTML5, CSS3
**Backend & APIs:** FastAPI, REST APIs, Postman
**Databases:** MySQL, PostgreSQL, MongoDB
**AI & ML:** NLP, LLM APIs, Prompt Engineering, RAG, Embeddings, Transformers
**Core Concepts:** Data Structures & Algorithms, OOP, DBMS, SDLC, Problem Solving, Software Engineering Principles
**Tools:** Git, GitHub, VS Code

## Experience

**Aintiram Web Technology** **Software Development Intern / L&D Trainee**

- Developed backend applications using Python, FastAPI, REST APIs, and SQL as part of software development tasks.
- Worked on database operations, API development, debugging, and testing to support reliable application functionality.
- Developed and tested REST APIs and investigated application issues using structured problem-solving and debugging techniques.
- Used Git-based version control and followed structured software development practices while collaborating in a professional development environment.

## Projects

**Movie Exploration Platform**
*React.js — JavaScript — REST APIs*

- Developed a responsive movie exploration application using React.js to browse and discover movies by category.
- Integrated third-party REST APIs to retrieve and process movie information including ratings and reviews.
- Managed asynchronous API responses and application state using React hooks and integrated frontend components with backend services.

**Fake News Detection System**
*Python — NLP — Scikit-learn*

- Developed a machine learning application in Python to classify news articles as real or fake.
- Performed data preprocessing and applied NLP techniques with TF-IDF for feature extraction.
- Built and evaluated supervised machine learning models using Scikit-learn and analyzed classification performance.

## Education

**Master of Computer Applications (MCA)** **2026**
*Kongu Engineering College, Erode* *CGPA: 8.20 / 10*

**B.Sc. Computer Science** **2024**
*Nadar Saraswathi College of Arts and Science, Theni* *CGPA: 7.4 / 10*

## Certifications

- MySQL Implementation Certified Associate – Oracle (July 2025)
- Data Visualization: Empowering Business with Effective Insights – Forage (June 2025)
